## Pembangunan Sistem E-Learning SMKN 3 Balige berbasis web

### Functional Requirement

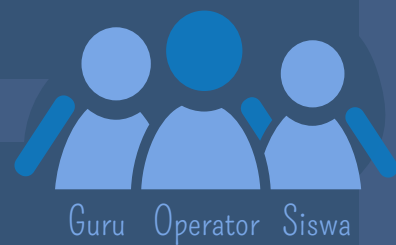

### Non-Functional Requirement

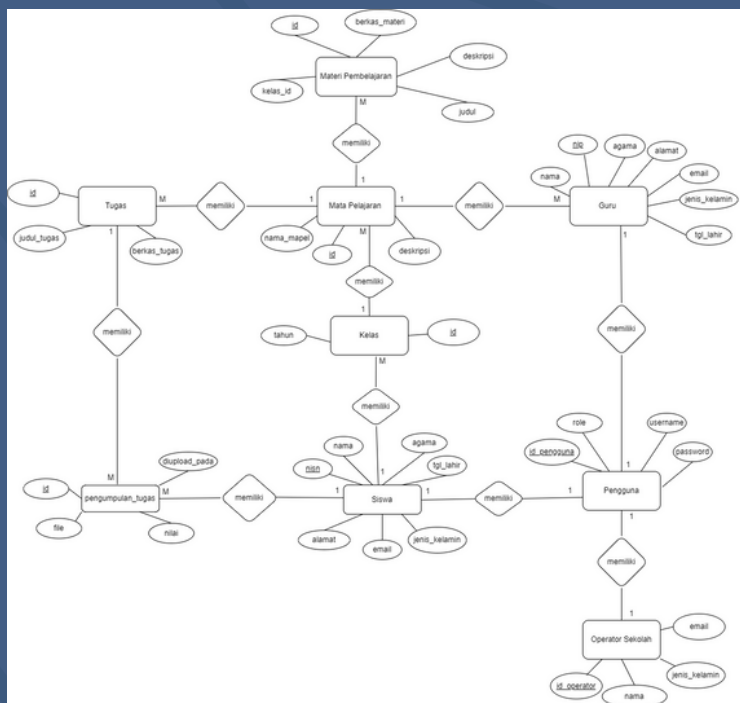

- Security
- Response Time
- Ergonomy
- Accessibility

### Background

During this pandemic, SMK Negeri 3 Balige using Whatsapp and Google Classroom as online learning media. The use of diverse platforms like this makes students, teachers and school staff overwhelmed because they have to adapt to each other systems. To deal with these problems, we built a SMK Negeri 3 Balige E-Learning System where this system will integrate every business process that can be done to support the teaching and learning process at SMK Negeri 3 Balige.

### Database Design

### Purpose

- E-Learning will facilitate interaction between students and teachers in the teaching and learning process
- Teachers can deliver additional material or supporting materials through online learning.
- Students can also collect assignments more effectively and efficiently by having time limits and learning information becomes more accessible to students.

## Website System
